INFORMATION COMMERCIAL VEHICLE ACCESS/ PARKING INSTRUCTIONS

For 2022 Car/Lorry Park C is being used for the vehicle marshalling area for Labelexpo Europe. All vehicles that require access to the site should park in this area and then make themselves known to ILS staff that will be based in the registration office at the top/front end of the parking area. (All signposted)

All drivers must have the following information with them on arrival:

- Stand name
- Stand number
- ILS Reference number – if applicable
(Provided when pre-booking onsite services with ILS)

Drivers will be issued with a vehicle entry pass which must be placed in the windscreen of their vehicle and must be on display at all times. Along with the entry pass and site map provided, drivers will be given verbal instruction with the most suitable access point to the relevant hall for offloading/ reloading.

Once drivers access the Exhibition Site and are directed to the most suitable area, they must commence offloading/ reloading without delay. For those who require the onsite services of ILS for the offloading/ reloading, they must make themselves known to ILS Service Desk personnel located at the front of each hall to arrange that service.

Due to the minimal space for parking around the halls, It is therefore important that once vehicles have been offloaded/ reloaded, drivers must remove their vehicles from outside the halls immediately.

There is no onsite parking for commercial vehicles, therefore your co-operation in making sure that once offloading/ reloading is complete vehicles are removed to allow space for others to gain access. Those Exhibitors/ Contractors who require parking during the build-up and breakdown days should return to the vehicle Park C for their daily parking.
